

Mode-AL design and manufacture modular Video Walls in two types:

Standard Video Wall: This is a modular system of 2x2, 3x2, 2x3 and 3x3 frameworks that can be bolted together to form a Video Wall of any size

Pop Out Video Wall: This variant shown below enables banks of screens to be popped out from the wall at any point for service and maintenance. Again, in a modular system the same as the standard Video Wall. This allows you to construct a wall of any size and gain access to any screen without disrupting any of the adjacent screens

Custom Video Walls designed and manufactured to your requirements for exhibitions or permanent installation.

Mode-AL can design, manufacture, install, and even build the flight cases for your product

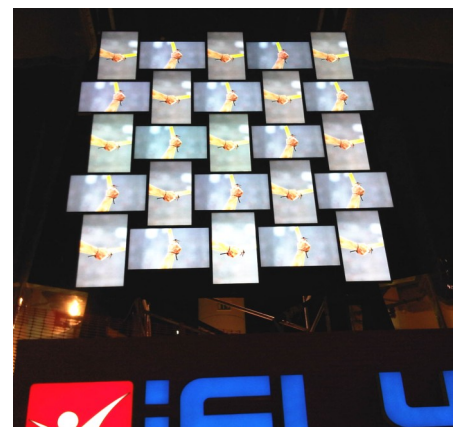

Side view of pop out mechanism showing access to rear of screen for service and maintenance

3x2x46" Video Wall shown with pop out mechanism

Sony Ziris Canvas demonstration wall designed to be erected in 4 hours and fits into 3 flight cases including all screens and PS3's

25 screen MAF Playnation Dubai
